DETAILED ACTION

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, 54, drawn to a method of inducing intracellular hyperthermia.

Group II, claim(s) 15-28, 54, drawn to a method of inducing intracellular free radicals.

Group III, claim(s) 29-36, 37-47, 54, drawn to a method of diagnosing and treating a disease in an animal.

Group IV, claim(s) 48-53, 54, drawn to a method of inducing heat shock proteins.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Each method involves different method steps which have different effects and different results. The method of Group I requires the induction of intracellular hyperthermia whereas the method in Group II requires the induction of intracellular free radicals and the method of Group IV requires the induction of heat shock proteins. The methods in Group III involve the diagnosis and treatment of diseases, whereas the other methods do not. The search required for one method is not required for the other.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Art Unit: 1614

(1) a mitochondrial uncoupling agent and (2) a second therapeutic agent.

Applicant is respectfully requested to elect a single species of "uncoupling agent" as well as a single species of the second therapeutic agent.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claim 3, 9, 12, 17, 24, 28, 35, 43, 45, 47, 50 correspond to the species listed above.

The following claim(s) are generic: claims 1, 15, 29, 37, 48.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each species claimed is chemically and structurally distinct and the search for one is not required for the other.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1614

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
